WEDDING & EVENT CATERING: POLICIES AND MENUS

INTRODUCTION

Henderson Food Service is a second generation food service company that has operated a restaurant and catering service successfully in Thomasville, Georgia for over sixty years.

We have the largest catering kitchen and staff in this area, and the depth of our food inventory and business volume give us the dependability and flexibility that our clients need. We are the exclusive caterer for some of the largest corporations in the area and several local plantations.

Our individual clients have taken us to events as far south as Orlando, Florida and as far north as Atlanta, Georgia. We have catered dinners for four people and banquets for several hundred. Every event is personally supervised by Richard Henderson.

SERVICES PROVIDED

We provide plates stemware, stainless flatware, and cloth or paper napkins. We have white tablecloths or plastic backed paper tablecloths available for an extra charge. All jobs include kitchen and table clean-up. Generally, the two types of service provided are buffet and seated service.

We provide bar set-up and service for beer, wine and mixed drinks for a separate charge.

The client usually provides volunteers for cake and punch service. This service by our staff is an extra charge.

PRICING

It is our policy to not price an event without a meeting or a specific list of foods and services desired. A personal meeting allows us to get a "feel" for what you want your event to accomplish, and therefore, what food and service will best accomplish that goal.

We can always devise a plan that will fit your budget. In making your budget, remember that the food is your "thank-you" to your guests for their support and affirmation of your wedding.

SOME ELEMENTS THAT AFFECT PRICE ARE:

Quality of foods selected: shrimp is more expensive than beef, beef is more than turkey, etc.

Variety of foods selected: The more items selected the more has to be provided, so that an item doesn't run-out.

Type of service: seated service and buffets require different amounts of labor.

Location: A remote location with limited kitchen facilities may cost more than a convenient location with good facilities.

Formality: ultra-formal service requires more labor than less formal settings.
